Secondary: from automatic shot-type labels and positions

Automatic labels drives and dinks are mostly recognised; drops (19%) and resets (4%) are often missed, so treat type splits as rough.

- Third shots by label: third-shot drive 32, drive 2 (of 34).
- Backhands by the move before them (51): pulled wide 59%, near the body 39%, ran around 2% estimated.
- Reached the net in 20% of 59 rallies (median 3 s after the serve) estimated.

How far to trust this

Venue: US Open: 35 of 36 tagged landings found, median 0.53 ft away (80% within 1.2 ft); zone same 27, boundary 5, different 3 of 35. Outgoing-flight status agrees on 60 of 67 shots inside the tagged stretch.

Evidence: landings 17 human-reviewed, 63 automatic. Locations are seen from behind the hitter (left = hitter's left); zones: kitchen 0–7 ft, midcourt 7–14.5 ft, deep 14.5–22 ft from the net, thirds across.

Scope: one match (Boyer vs Devilliers). Projected landings of intercepted balls are not available. Speed is not checked against radar.
